EDUCATION

BOSTON UNIVERSITY

Boston, MA

B.S. in Mechanical Engineering, graduating in May 2027

2023 – 2027

- **GPA:** 3.55/4.00
- **Concentration:** Robotics (i.a. Machine Design, Automation/Manufacturing Methods, Controls, Dynamics, Robotics 1)
- **Projects:** Warehouse Robot, Autonomous Connect-4 game, Autonomous Skittles Color Sorter, Ultrasonic Sensor

MOURATOGLOU INTERNATIONAL SCHOOL

Nice, France

US High School Diploma & AP Curriculum

2019 – 2023

- **GPA:** 4.15/4.00

WORK EXPERIENCE

AMAZON

Erfurt, Germany

Operations Engineer Intern, ERF1 (Amazon Erfurt site) – RME Dept.

Summer 2026

- Coordinated the rollout of Amazon's Vulcan Robot for ERF1 RME, navigating German safety/compliance requirements, owning Vulcan's training program, serving as POC between Amazon Robotics and local RME Dept.
- Built and developed the team's primary knowledge hub website used by 70+ technicians, engineers, and managers
- Built a project and shift-handover tracker for Senior Technicians to log project progress and pass tasks between shifts
- Ran SQL queries to trace equipment performance drops back to their root causes, and performed Permit to Work reviews for contractors on high-risk operations

SIEMENS

Munich, Germany

Automation Engineer Intern, R&D Dept – Industrial Metaverse Lab

Summer 2025

- Programmed a S7-1500 PLC using ladder logic to control a robotic production line
- Developed a digital twin model of that robotic production line achieving 98% similarity
- Implemented custom kinematics for virtual robot arms to mirror physical motion to 100%
- Connected to the Siemens AI Copilot, allowed for a human-friendly interface with voice commands

ENERGY CONSULTING SOUTH BAVARIA

Munich, Germany

Data Management Intern

Summer 2024

- Organized an Excel database for 1,000+ new customer invoices and calculated their individual subsidies
- Drafted grant applications to secure government funding for renewable energy projects

PROJECTS (find more inspiring projects on my [portfolio](#))

Warehouse Robot

Boston, MA

Intro to Robotics

Spring 2026

- Built a 6 DOF robot manipulator with gripper and force feedback to autonomously sort 5-10cm packages by size
- Used an ESP32 and C++ for logic, and simulated forward- and inverse kinematics, and joint space on MATLAB

TECHNICAL SKILLS

- **Programming:** Python, MATLAB, C++, HTML/CSS, SQL, Siemens PLC
- **Simulation:** SolidWorks, OnShape, Fusion 360, Abaqus, COMSOL, TIA Portal, Siemens Process Simulate
- **Manufacturing:** CNC, CAM, Machining, Laser Cutting, 3D Printing, Soldering, Technical Drawings (2D & 3D)
- **Program Mgmt:** End-to-End Program Ownership, Cross-Functional Collaboration, Stakeholder Management

ADDITIONAL INFORMATION

- **Certificates:** AI Infrastructure - NVIDIA (*completed*), Cloud Practitioner Foundational - AWS (*in progress*)
- **Volunteering:** MIT Ncaa Division III Men's Tennis Volunteer Assistant Coach, BU Resident Assistant
- **Interests:** Tennis (World Rank #976 in U18, 11.96 UTR), Skiing, Running
- **Languages:** English (native), German (native), French (proficient)
